Embedded	Calculator (specific items, grades 6–8 and 11)
American sign language ¹	Large-print special form (as available)
Braille ¹	Multiplication table
Speech-to-text	Print on demand
Non-Embedded	Speech-to-text
100s number table	Word prediction
Abacus	
Alternate response options	
Braille (special form)	

Resources for the California Alternate Assessment

All eligible students shall have any instructional supports and/or accommodations, including the language of instruction, used in their daily instruction in accordance with each student's IEP.

The administration of the California Alternate Assessments (CAAs) to eligible students shall be one-on-one (test examiner to student), according to the California Assessment of Student Performance and Progress (CAASPP) manual. Depending on the student's disability or needs, the CAAs may or may not include the student's independent use of the testing interface. Because the CAAs are given to students one-on-one by a test examiner, some embedded resources are not provided. For example, while a braille version of the test is not provided, the test may be presented using an embosser or a refreshable display.

¹ Resource not available for the CAAs.
